PROFESSIONAL SUMMARY

AI Test Engineer with 2+ years of software quality engineering experience across enterprise applications, conversational AI, and voice-agent workflows. Evaluates AI responses for factual consistency, hallucinations, safety, and business-rule compliance. Develops UI and API automation using Python, Playwright, Pytest, and Postman, with SQL and SOQL validation. Focused on reliable test evidence, reproducible defects, and human-reviewed AI evaluation.

TECHNICAL SKILLS

AI evaluation: Conversational AI and voice agents, transcript analysis, hallucination detection, conversation-flow and outcome validation, prompt-injection and guardrail testing

Test automation: Python, Playwright, Pytest, pytest-playwright, Selenium WebDriver

API and data testing: Postman, Postman CLI, REST APIs, HMAC authentication, idempotency, schema validation, PostgreSQL, SQL, SOQL

Delivery and platforms: Azure DevOps, Git, CI/CD, Salesforce, HP ALM, Buganizer; HTML, JSON, and JUnit reporting

Framework and agent tools: FastAPI, React, Vite, Microsoft 365 Copilot, ServiceNow integration concepts

PROFESSIONAL EXPERIENCE

XEROX PHILIPPINES

AI Test Engineer | Cebu City, Philippines | May 2026 - Present

- Formulated and executed 100+ regression scenarios for AI conversations, covering functional, negative, boundary, and exploratory testing of inbound and outbound voice-agent workflows.
- Evaluate end-to-end AI conversations for factual consistency, safety, and policy and business-rule compliance, supporting release readiness with a hallucination rate below 2% in evaluated conversations; validate corrections, transfers, callbacks, tags, and final outcomes.
- Develop Python, Playwright, and Pytest automation for application navigation, form completion, test-call initiation, asynchronous interactions, and dashboard-result verification.
- Build Postman and Postman CLI tests for HMAC authentication, invalid inputs, schema and response validation, idempotency, duplicate prevention, and record-level rejection reasons.
- Validate transcripts, API responses, dashboards, and backend state to support reproducible defects and traceable test evidence; generate HTML, JSON, and JUnit reports.
- Contribute to an AI test automation framework using React, Vite, FastAPI, PostgreSQL, and Azure DevOps for batch simulations, background execution, transcript recovery, and reporting.

PROFESSIONAL EXPERIENCE - CONTINUED

ACCENTURE INC.

Quality Engineering Analyst | Manila, Philippines | Aug 2024 - May 2026

- Executed functional, regression, integration, smoke, exploratory, and user acceptance tests across UI, backend, Salesforce, and AI-driven features.
- Validated Gemini-generated outputs against expected behavior, documented discrepancies, and supported defect resolution and retesting.
- Used SQL and SOQL to validate application data and Salesforce records; tracked and managed defects in HP ALM and Buganizer.
- Collaborated with cross-functional teams on defect validation, regression testing, and release quality.

SELECTED AI TESTING AND AUTOMATION PROJECTS

AI-Assisted Test Results Validator

Designed a second-review workflow that distinguishes pass, fail, review-needed, missing-evidence, and input-error outcomes. Incorporated evidence-sufficiency checks, human confirmation, override, and revalidation.

AI Test Evidence Package Recorder

Developed a Python application for screenshot capture, annotation, transcript and tag evidence, and structured PDF evidence packages for functional and conversational AI testing.

API Test Automation

Automated contact-enrollment scenarios covering invalid data, duplicate requests, sequence references, HMAC authentication, and idempotency using reusable Postman environments and CLI reports.

AI Adversarial Testing

Performed authorized prompt-injection, instruction-manipulation, and guardrail testing. Participated in an internal AI security hackathon and documented test conditions, observed behavior, impact, and regression recommendations.

EDUCATION

Bachelor of Science in Electronics Engineering
Bataan Peninsula State University | 2019 - 2023

CERTIFICATIONS, LICENSES AND TRAINING

Licensed Electronics Engineer (ECE) | Professional Regulation Commission, Philippines
June 2024 - June 2027

Certified AI-Empowered SAFe 6 Practitioner | Scaled Agile
Valid through October 19, 2027 | Credential ID: 39880489-1666

Additional training: AI Prompting for Automation Level III - Lexmark / TESDA; Automation Testing ASE Bootcamp - Accenture; Agentic AI and Generative AI Training - Accenture
